

Mirrors & Silvers

individual
choice
to reflect the
real you

A wide range of options means greater clarity!

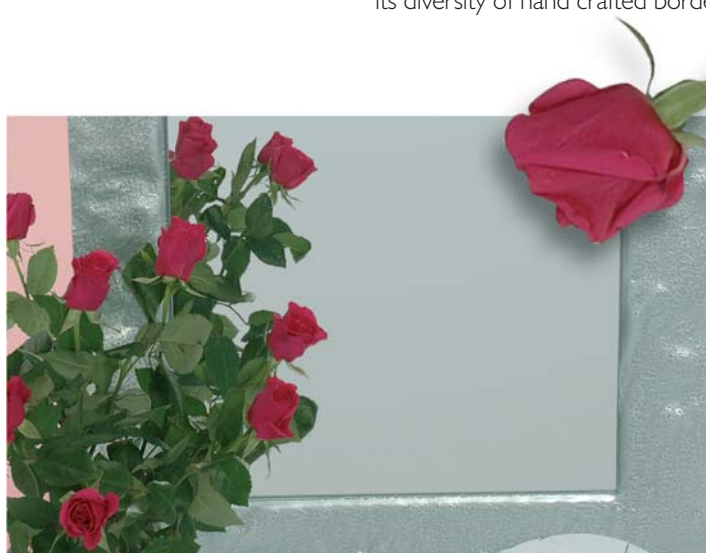

The Walshs Range of Mirrors

Mirrors serve so many purposes. In essence they allow us to see who we are. But they can also reflect our personality to those we invite into our home.

A Walshs Mirror is available in a selection of finishes to complement each and every space within your home. If you are looking for a traditional finish, consider selecting from our extensive range of frames.

Or if you wish a minimalist look in your home perhaps finishing your mirror with a bevelled edge is the perfect solution for you. Beveling is available in a large range of styles.

The more adventurous, seeking a unique style, should look no further than our unique EcoForm range, with its diversity of hand crafted borders.

Special Purpose Silvering

First developed in the 1300s, the process of silvering is used to create mirrors. Standard silvering consists of a thin layer of tin sprayed onto standard float glass. After this 99.9% pure silver is applied, followed by copper to protect the silver from tarnishing and finished with a painted coating.

There are times when a standard mirror is not suitable. To meet these needs, Walshs offer a range of silvering solutions.

Laminate Mirrors consist of a standard mirror with clear or tinted interlayers giving them superior safety qualities. They are the perfect solution for use in schools, childcare centres, lifts and gymnasiums.

Walshs One Way Vision is a SS08 laminate that enables one way vision when required in special circumstances.
