

# Shower Screens

create a fresh  
clean feel to lift  
your spirits and  
begin the day

# Enhance the visual appeal of your bathroom

*The bathroom is one of the most intimate places in your home.*

*It needs to be a place you feel comfortable in, a space you enjoy spending time making yourself ready to face the day ahead.*

*We acknowledge that and offer you a range of shower screen alternatives to complement the bathroom you are creating to enjoy every day.*

## Timeless and Frameless

The **Walshs Frameless Showerscreen** offers a minimal visual impact on your bathroom. The look is elegant and timeless, with enclosures manufactured from 8mm or 10 mm toughened glass offering total peace of mind, and is supported by a range of sophisticated and tasteful fittings.

With little more than glass to be cared for, a frameless showerscreen makes your bathroom easier to keep looking fresh and clean.

### Acknowledge your individuality

The Walshs range of EcoForm glass is a unique textured glass that allows you to add a touch of difference to your bathroom. Complement your EcoForm showerscreen with matching vanities, mirrors and washing vessels. Ask for our EcoForm brochure to find out more.

## Simple but Sophisticated

The Walshs Semi-Framed Showerscreen features a rounded convex profile that is neat and tidy to the eye and allows you to colour match with the look of your bathroom.

### Smooth, safe and quiet

With a smooth action door utilising a stainless steel pivot pin you can be sure of having a 'positive close'. Whisper quiet, the pivoting door has been designed with a built in lowering effect which reduces the gap between door and sill on closure meaning minimal water splashage outside the shower enclosure. The smooth contoured profiles mean minimal soap and residue can accumulate, making cleaning and maintenance so much easier.

With a 180° door swing possible, as well as an inward or outward opening choice, you have maximum use of your bathroom.

Designed specifically for use with toughened glass to comply with Australian Standards you are assured of a safe environment for your family.

### Creating continuity

To enhance the look of your bathroom, the Walshs Semi-Framed Showerscreen offers an extensive range of handles in powdercoated, and gold or chrome plated finishes. All componentry and design features can be colour co-ordinated.

### Made especially for you.

Not every bathroom is standard and many have unique features that need to be considered. The Walshs Semi-Framed Showerscreen can be adapted and designed for fitting into most situations. Ask us for advice on creating a design that suits your needs.

## Functional and attractive

The **Walshs Fully-Framed Fixed Panel Showerscreen** is the perfect solution for most bathrooms. Affordable and functional, it offers a range of stylish colours to co-ordinate with your bathroom. Or if you must have that very special colour, we can colour match for you.

### Designed for you

The contoured fully enclosed twin-tiered sill is specially designed to direct water run off to the shower base, and is complemented with a gasket sealing system to ensure maximum water resistance.

With an unobtrusive low profile and only 4mm spacing at the sill, the showerscreen offers reduced external splashing to help you keep the bathroom cleaner, drier and safer.

### Whisper quiet and smooth to operate

As with all the Walshs Showerscreen range, our fully-framed fixed panel showerscreen utilises a stainless steel pivot pin with a 'positive close' low friction design.

The lowering effect of the design automatically reduces the gap between the sill and the door on closure. This helps to eliminate water escaping the shower area and improves water resistance.

### Easy to maintain and clean

The smooth contoured profiles of this showerscreen range means minimal soap and residue can accumulate, making cleaning and maintenance simple.

With a full length continuous double-handed door handle, this showerscreen is designed with the whole family in mind.

Easy to reach for everyone, it is user friendly, safe and functional.

The Walshs Fully-Framed Fixed Panel Showerscreen is not just an 'off the shelf' product.

It can also be designed for easy installation in most bathroom environments.
